AMENDMENTS TO THE SPECIFICATION:

Please replace the paragraph at page 15, lines 10-19 with the following paragraph:

FIG.11 is a cross sectional view showing part of a light emitting apparatus in the eighth preferred embodiment of the invention. Different from the light emitting apparatus **1** of the sixth embodiment, the light emitting apparatus **1** of the eighth embodiment is composed such that the transparent structure **5** has four inclined planes **5b**, **5c** with a hexagonal cross section to enlarge its center portion in the front, back, right and left directions. Like components are indicated by same numerals used in the sixth embodiment, and explanations thereof are omitted below.
